Handbook of Machining with Grinding Wheels

The three principal machining processes are classified as turning, drilling and milling. Other operations falling into miscellaneous categories include shaping, planing, boring, broaching and sawing. Turning operations are operations that rotate the workpiece as the primary method of moving metal against the cutting tool.

Machining - Wikipedia

Abstract Necessity to use new materials, demanding functional requirements and miniaturization have led to evolution of modern manufacturing processes.

Modern Manufacturing Processes: A Review

Electrochemical machining (ECM) is a method of removing metal by an electrochemical process. It is normally used for mass production and is used for working extremely hard materials or materials that are difficult to machine using conventional methods. Its use is limited to electrically conductive materials. ECM can cut small or odd-shaped angles, intricate contours or cavities in hard and ...

Many of our finest Manufacturers and Machine Shops have closed their doors because of the lack of support from our own government. Professional politicians with little or no business experience have taken their toll on our industry. Our web site directory started on July 4th 2000 and many of our friends have closed their doors since then...
