Antenna Design Guide - LSR

The antenna (L) with the internal parallel capacitor (C int) creates a resonant frequency. If an external resonance capacitor is not used, the typical resonance capacitor is calculated:

This can be a straight trace inverted F, -type trace, meandered trace, circular trace, or a curve with wiggles depending on the antenna type and space constraints .

AN11740. PN5180 Antenna design guide . Rev. 1.1 19 June 2018 ... The antenna design for the PN5180 is not much different than the antenna design for most of the other NXP reader ICs in general. However, some PN5180 specific details need to be considered to get an optimum performance.
