

### **ap biology lab photosynthesis pdf**

AP BIOLOGY LAB: PHOTOSYNTHESIS (adapted from AP College Board Photosynthesis lab) Background and Pre-lab: Photosynthesis fuels ecosystems and replenishes the Earth's atmosphere with oxygen. Like all enzyme-driven reactions, the rate of photosynthesis can be measured by either the disappearance of substrate, or the accumulation of product.

### **AP BIOLOGY LAB: PHOTOSYNTHESIS**

In the first part of the lab, students learn how to measure the rate of photosynthesis indirectly by using the floating leaf disk procedure to measure oxygen production. Alternatively, they could explore how to measure the rate of photosynthesis using various probes interfaced to computers.

### **AP Biology Investigative Labs - Mrs. Chou's Classes**

AP Biology investigation on photosynthesis includes background information and instructions for using spinach leaf disks, light, and baking soda to measure the rate of photosynthesis. Specific instructions are included for measuring the rate of photosynthesis in relation to light and carbon availability.

AP Biology 2004-2005 Lab 5: Cellular Respiration ESSAY 1990 The results below are measurements of cumulative oxygen consumption by germinating and dry seeds. Gas volume measurements were corrected for changes in temperature and pressure. a. Plot the results for the germinating seeds at 22°C and 10°C. b.

### **BACKGROUND - College Board**

This lab is a fitting climax to the series of 12 AP®-recommended biology labs. It applies knowledge gained in several of the other labs, especially Lab 4 on photosynthesis and Lab 5 on cellular respiration.
