### **Department of Kinesiology, Health, and Nutrition < The**

Applied psychology is the use of psychological methods and findings of scientific psychology to solve practical problems of human and animal behavior and experience. Mental health, organizational psychology, business management, education, health, product design, ergonomics, and law are just a few of the areas that have been influenced by the application of psychological principles and findings.

The Chinese used such techniques more than 3000 years ago. [citation needed] Hippocrates also used such techniques as did the ancient Egyptians and other cultures. In the late 19th century in North America, therapies including osteopathy and chiropractic became popular. Spinal manipulation gained mainstream recognition during the 1980s.
