Conversion therapy is the pseudoscientific practice of trying to change an individual's sexual orientation from homosexual or bisexual to heterosexual using psychological or spiritual interventions. There is virtually no reliable evidence that sexual orientation can be changed and medical bodies warn that conversion therapy practices are ineffective and potentially harmful.

There has been a lot of debates around when to use stored procedures vs. raw sql. Many purists are vehemently on one side of the fence or the other. Strangely people talk about views to a lesser extent. Stored functions and triggers are almost nonexistent in these debates. In this article we'll try to provide a non-biased outline of the benefits and pitfalls of each approach.
