Chapter 7 Cell Structure and Function Since the 1600s, scientists have made many discoveries about the cells of living things. These discoveries are summarized in the cell theory. The cell theory states: • All living things are made up of cells. • Cells are the basic units of structure and function in living things.

Chapter 7 Cell Structure and Function

• Cells are the basic units of structure and function in living things. • New cells are produced from existing cells. Exploring the Cell Scientists use light microscopes and electron microscopes to explore the structure of cells. Compound light microscopes have lenses that focus light. They magnify objects by up to 1000 times. Chemical stains and fluorescent dyes make cell structures easier to see.
