How Science Has Revolutionized the Understanding of Drug Addiction For much of the past century, scientists studying drugs and drug use labored in the shadows of powerful myths and misconceptions about the nature of addiction. When scientists began to study addictive behavior in the 1930s, people addicted to drugs were thought to be morally flawed and lacking in willpower.

Preface | National Institute on Drug Abuse (NIDA)

Substance dependence, also known as drug dependence, is an adaptive state that develops from repeated drug administration, and which results in withdrawal upon cessation of drug use. A drug addiction, a distinct concept from substance dependence, is defined as compulsive, out-of-control drug use, despite negative consequences. An addictive drug is a drug which is both rewarding and reinforcing.

Substance dependence - Wikipedia

The prohibition of drugs through sumptuary legislation or religious law is a common means of attempting to prevent the recreational use of certain harmful drugs and other intoxicating substances.. While some drugs are illegal to possess, many governments regulate the manufacture, distribution, marketing, sale and use of certain drugs, for instance through a prescription system.

Prohibition of drugs - Wikipedia

Behavioral Conditioning. In 1906 Pavlov cut holes in dogs'™ cheeks and inserted tubes to measure salivation. A bell was rung just before food was given to the dogs, and after a period of time it was observed that the ringing of the bell alone would increase the rate of the dogs'™ salivation [—Pavlov, Ivan Petrovich (1849-1936),— The Encyclopedia Americana (New York: Americana ...
