Reference values for feeding parameters of isopods (Porcellio scaber, Isopoda, Crustacea) 315 The aim of our study was to set the limits for feeding parameters of the terrestrial isopod Porcellio scaber (Isopoda, Crustacea) in laboratory-controlled experiments, which could serve as a benchmark for feeding rate of control, non-stressed animals.

Reference values for feeding parameters of isopods

Cluster analysis or clustering is the task of grouping a set of objects in such a way that objects in the same group (called a cluster) are more similar (in some sense) to each other than to those in other groups (clusters). It is a main task of exploratory data mining, and a common technique for statistical data analysis, used in many fields, including machine learning, pattern recognition ...

In mathematics, the harmonic mean (sometimes called the subcontrary mean) is one of several kinds of average, and in particular one of the Pythagorean means. Typically, it is appropriate for situations when the average of rates is desired.. The harmonic mean can be expressed as the reciprocal of the arithmetic mean of the reciprocals of the given set of observations.

Synonymous mutations change the sequence of a gene without directly altering the sequence of the encoded protein. Here, we present evidence that these "silent" mutations frequently contribute to human cancer.

Synonymous Mutations Frequently Act as Driver Mutations in

Thanks to Tiffany for bringing my attention to the fact that the solution to the second example in the review lesson for E.2 was not consistent with the solutions to somewhat similar problems from old exams and sample exams.
