1.. Introduction In this paper we introduce a new method for the analysis of problems governed by partial differential equations such as, for example, solids, structures and fluids.

### **Isogeometric analysis: CAD, finite elements, NURBS, exact**

In mathematics, a fractal is a detailed, recursive, and infinitely self-similar mathematical set whose Hausdorff dimension strictly exceeds its topological dimension and which is encountered ubiquitously in nature. Fractals exhibit similar patterns at increasingly small scales, also known as expanding symmetry or unfolding symmetry. If this replication is exactly the same at every scale, as in ...

In geometry, a simplex (plural: simplexes or simplices) is a generalization of the notion of a triangle or tetrahedron to arbitrary dimensions. Specifically, a  $k$ -simplex is a  $k$ -dimensional polytope which is the convex hull of its  $k + 1$  vertices. More formally, suppose the  $k + 1$  points  $\hat{v}_i, \hat{v}^i$  are affinely independent, which means  $\hat{v}^i, \hat{v}^j, \hat{v}^k$  are linearly independent.
