Irrigation & Drainage Engineering Houndout Adama University

Irrigation is the application of controlled amounts of water to plants at needed intervals. Irrigation helps to grow agricultural crops, maintain landscapes, and revegetate disturbed soils in dry areas and during periods of less than average rainfall. Irrigation also has other uses in crop production, including frost protection, suppressing weed growth in grain fields and preventing soil ...

Study on construction technology of water saving

Find the specifications, installation guides, approvals and other ADS product engineering resources you need by searching our Engineering Resources database. Filter by product or market type, and even by the type of information source you need. It's easy and fast.

Engineering Resources | Advanced Drainage Systems

The International Commission on Irrigation and Drainage is dedicated to enhancing the worldwide supply of food and fibre for all people by improving water and land management and the productivity of irrigated and drained lands through appropriate management of water, environment and application of irrigation, drainage and flood management techniques.

ICID : Catalogue of ICID Publications

The environmental impacts of irrigation relate to the changes in quantity and quality of soil and water as a result of irrigation and the effects on natural and social conditions in river basins and downstream of an irrigation scheme. The impacts stem from the altered hydrological conditions caused by the installation and operation of the irrigation scheme.

Environmental impact of irrigation - Wikipedia

ABSTRACT: The drainage infrastructure constructed by the Inca at ancient Machu Picchu represents a significant public works achievement. The difficult site constraints associated with the nearly 2,000 mm per year of rainfall, steep slopes, landslides, and inaccessibility posed drainage challenges that were met successfully by the Inca.

In 1959, a grant from the Commonwealth Government enabled the Western Australian Government to start work on the massive Ord River Irrigation Scheme, a bold plan to develop part of the tropical north for intensive irrigated agriculture. The project, however, has been plagued by delays, cost blowouts and planning problems and has fail to achieve economic success.
