

### **netherlands rail map pdf**

Rail transport in the Netherlands uses a dense railway network, that connects virtually all major towns and cities, counting as many train stations as there are municipalities in the Netherlands. The network totals 3,223 route km, (which represents 6,830 kilometres of track as there can be a line running both ways, or two lines running each way on important routes) three quarters of which has ...

Train number series. Below are the train routes in the Netherlands (in 2011) with the number of the train series. It is typically a multiple of 100, while the train numbers add a number in the range 1 through 99 to it (where odd numbers are for trains in one direction, and even numbers for trains in the opposite direction, except for some international services).
