Consolidation refers to the process by which soils change volume in response to a change in pressure. According to the "father of soil mechanics", Karl von Terzaghi, consolidation is "any process which involves a decrease in water content of saturated soil without replacement of water by air". In general it is the process in which reduction in volume takes place by expulsion of water under long ...

### **Consolidation (soil) - Wikipedia**

Soil liquefaction occurs when a saturated or partially saturated soil substantially loses strength and stiffness in response to an applied stress such as shaking during an earthquake or other sudden change in stress condition, in which material that is ordinarily a solid behaves like a liquid.. In soil mechanics, the term "liquefied" was first used by Allen Hazen in reference to the 1918 ...
