EI's Transmission, Distribution, Metering & Mutual Assistance Conference is the premier conference that focuses on transmission, distribution and metering issues for the investor-owned electric utility community.

EI- Transmission Distribution Metering & Mutual Assistance

Electric power transmission is the bulk movement of electrical energy from a generating site, such as a power plant, to an electrical substation. The interconnected lines which facilitate this movement are known as a transmission network. This is distinct from the local wiring between high-voltage substations and customers, which is typically referred to as electric power distribution.
